

Connection Guide for iPhone

Pair a third-party Bluetooth accessory with your iPhone, iPad or iPod touch

(These instructions are copied from the Apple Support web page)

<https://support.apple.com/en-au/HT204091>

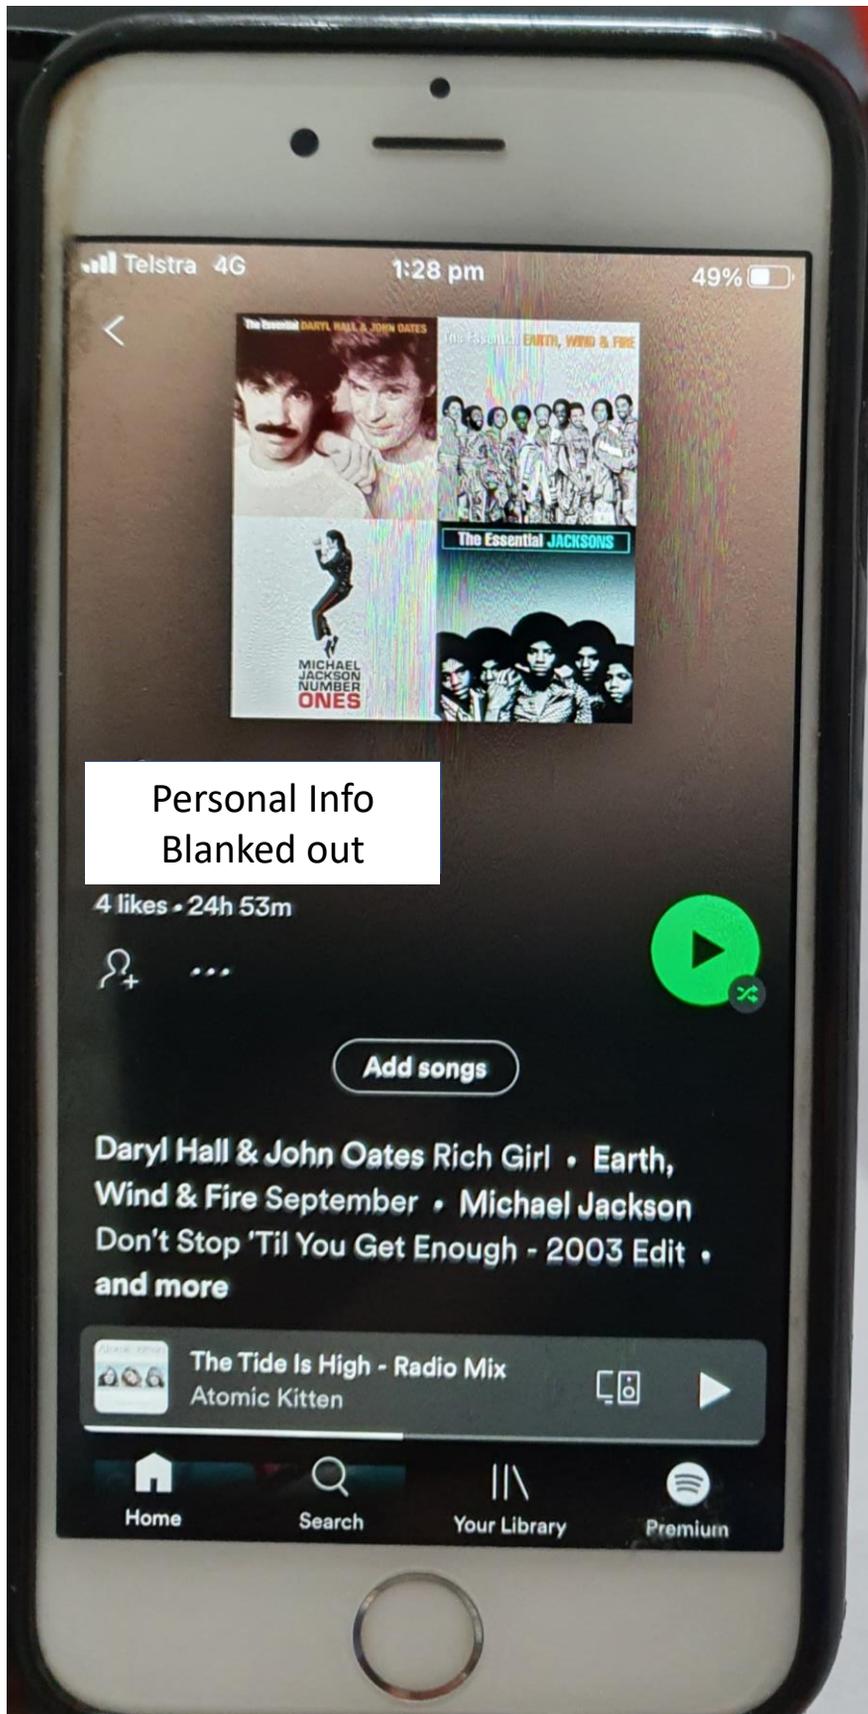

Pair your device with a Bluetooth accessory

1. On your device, go to Settings > Bluetooth and turn on Bluetooth. Stay on this screen until you complete the steps to pair your accessory.
2. Place your accessory in discovery mode and wait for it to appear on your device. If you can't see it or aren't sure how to make it discoverable, check the instructions that came with your accessory or contact the manufacturer.
3. To pair, tap your accessory name when it appears on the screen. You may need to enter the PIN or passcode. If you aren't sure what your PIN or passcode is, check the documentation for your accessory.

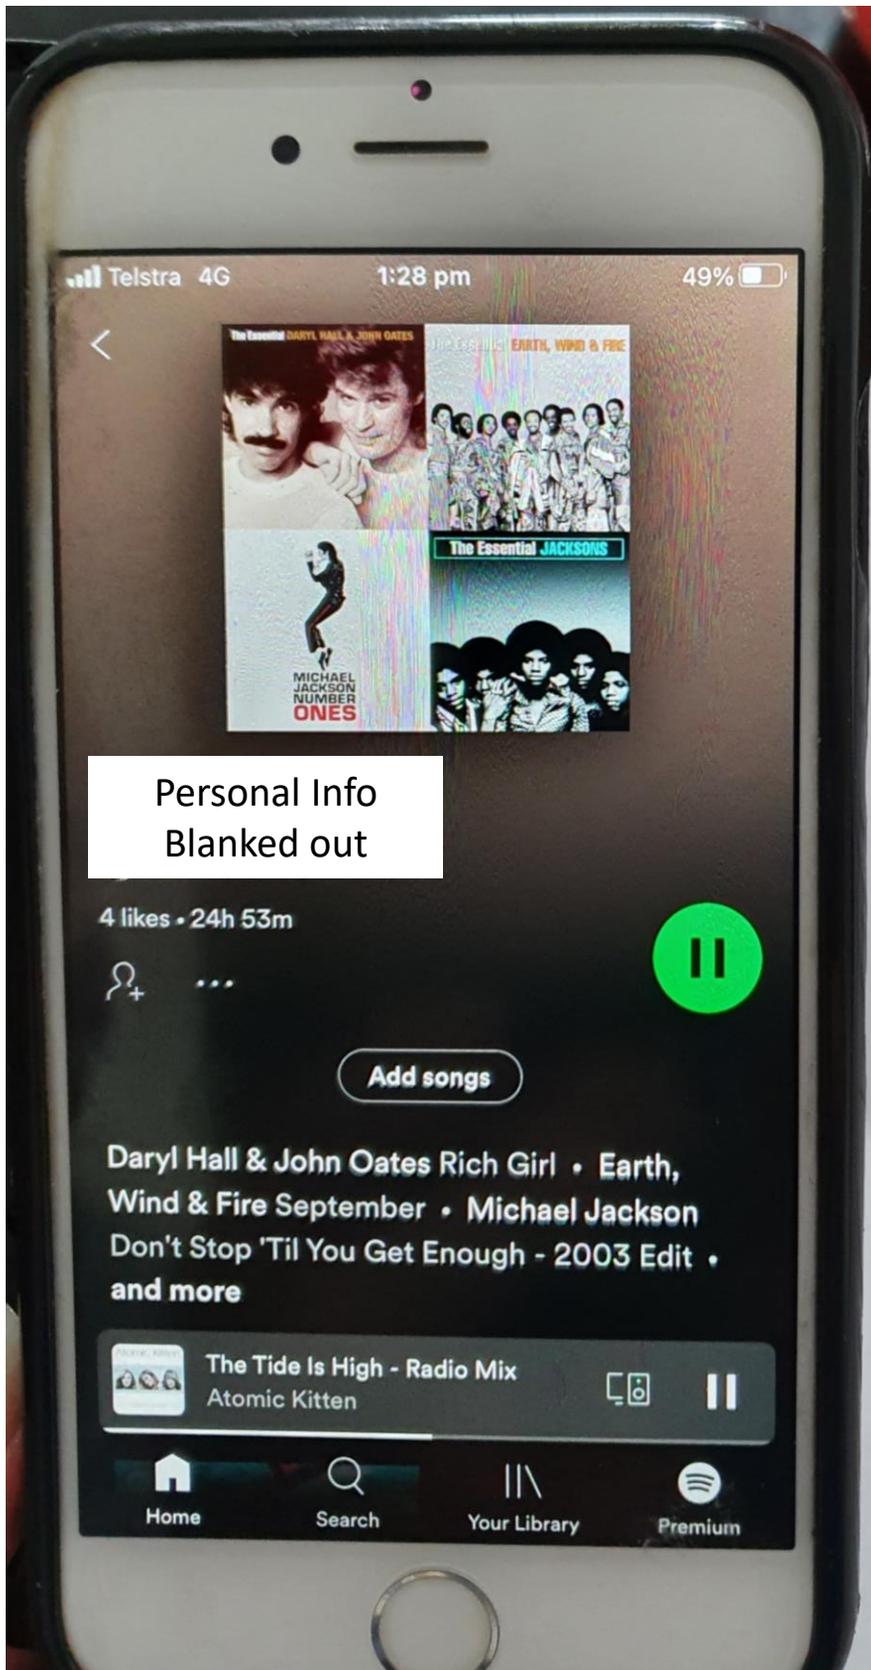

After you've paired your accessory, you can use it with your device.

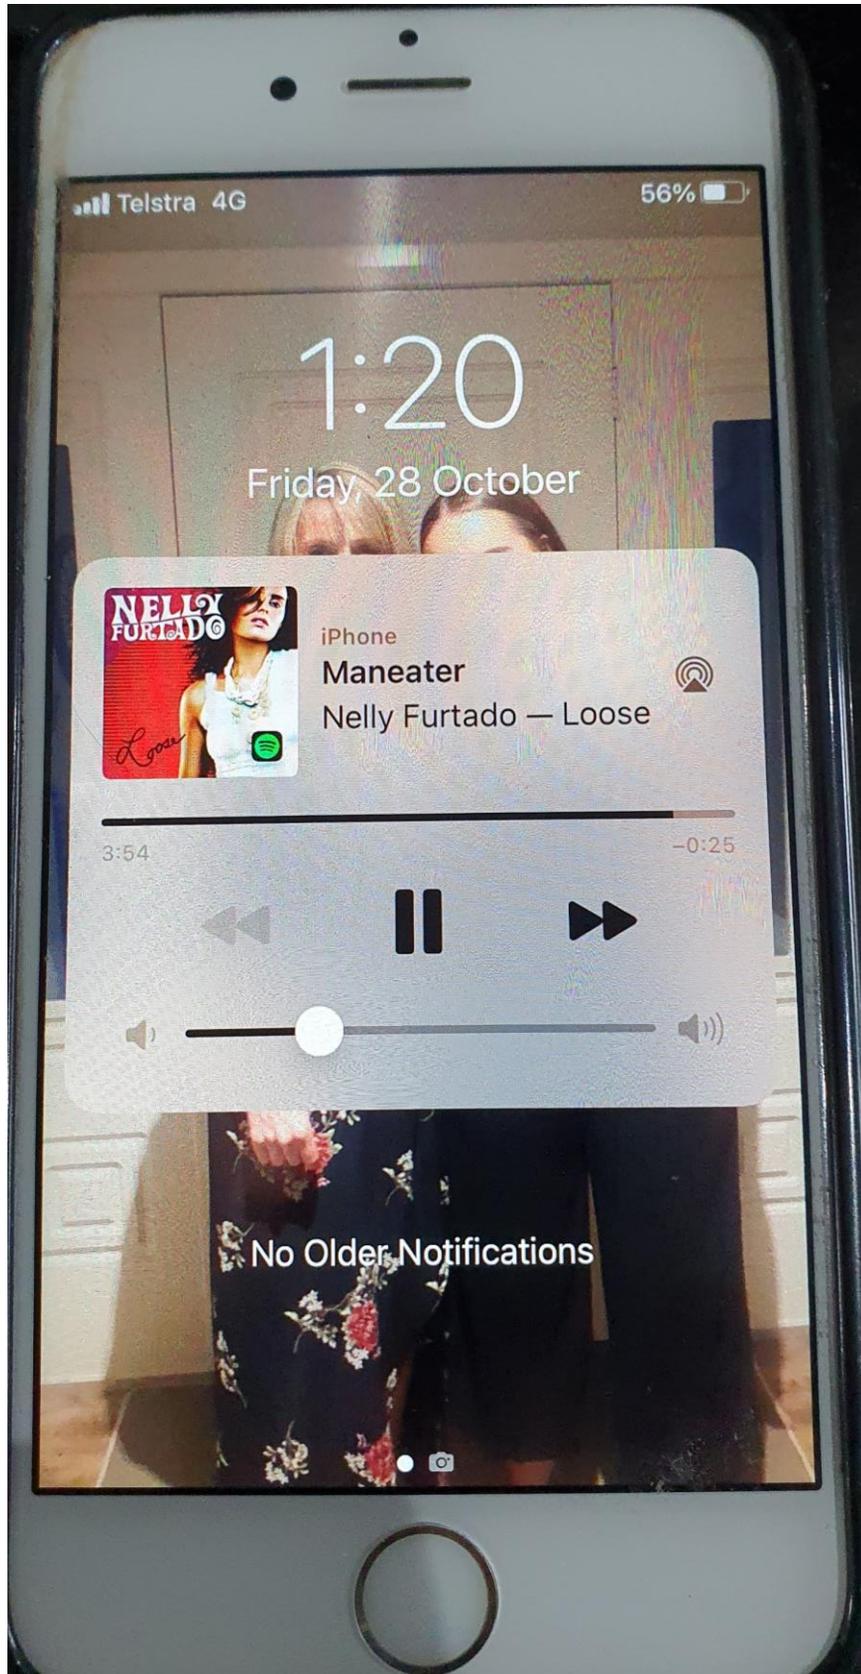

Open your music App (this photo is "Spotify")
and check it will play music OK.

Pause the playback

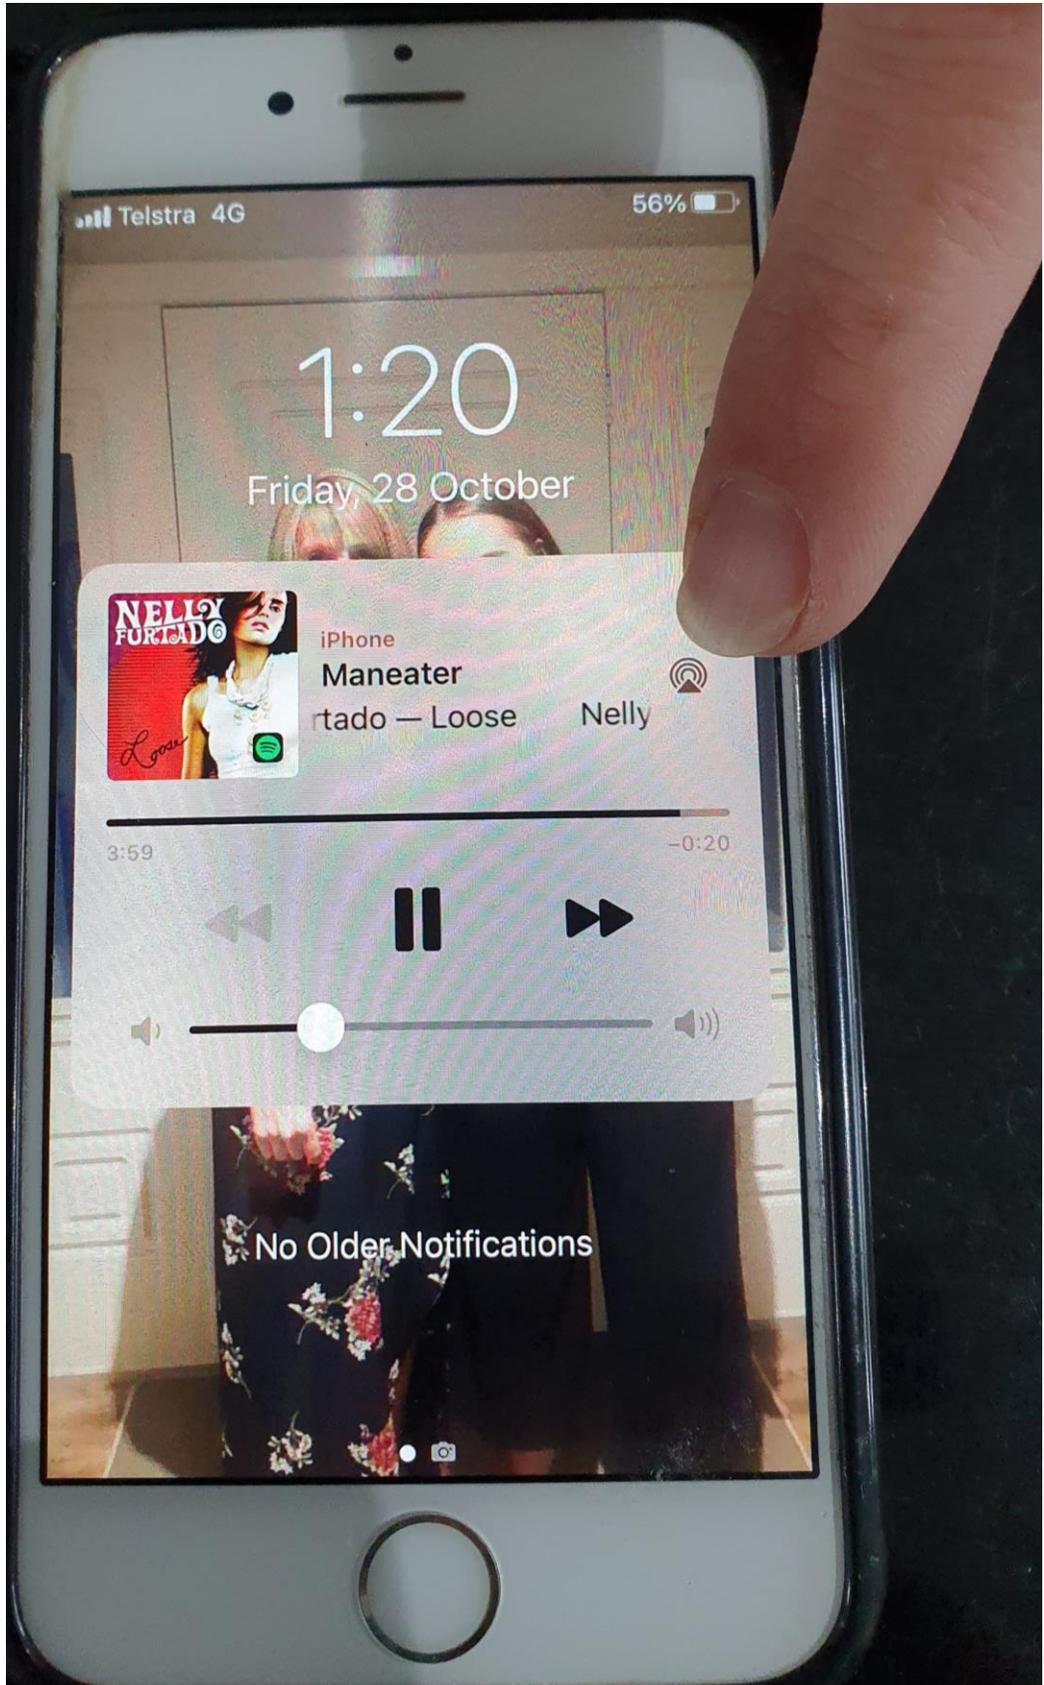

SWIPE DOWN from the top
To open the control panel

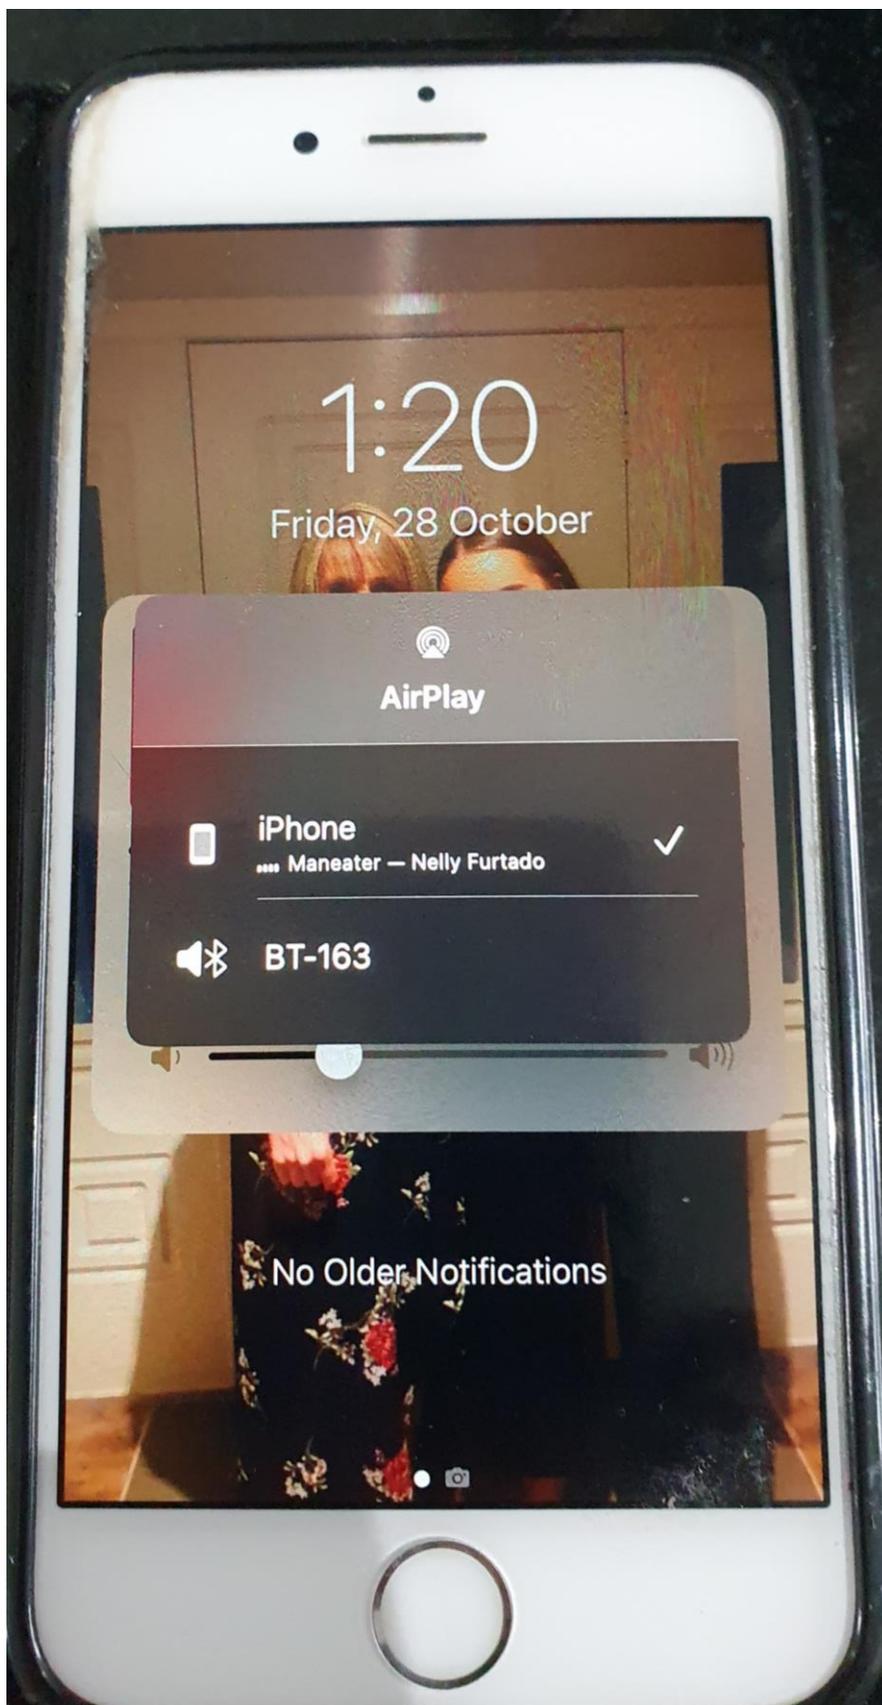

Identify the “Settings” button
and click on it.

(Being pointed to in this photo)

Change the playback destination
(In this photo the Bluetooth Module is "BT-163")

**Check that the Playback destination is now your
paired Bluetooth Dongle.**
(Music should start to play on your Bluetooth Accessory)
